EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record does not disclose or reasonably suggest the combination of populating a license plate number field of a form, separating blocks of text from input utterances by natural speech pauses, and echoing blocks of text back to a speaker. *Takebayashi et al.* discloses populating fields of a form from blocks of text for input utterances, and echoing blocks of text back to a speaker, where recognized words can be values or commands. *Cornelison* suggests an application of speech recognition to license plate numbers and letters. However, the combination of *Takebayashi et al.* and *Cornelison* still omits separating blocks of text from input utterances by natural speech pauses. Applicants' Specification, Pages 11 to 12, Paragraph [0025], discloses that separating pauses between "Adam Boy" and "Charley" causes a recognizer to output two blocks "AB" and "C". The prior art of record does not disclose or reasonably suggest separating blocks of text from input utterances by natural speech pauses in combination with populating a license plate number field of a form and echoing blocks of text back to a speaker.

Regarding claim 25, the prior art of record does not disclose or reasonably suggest the combination of populating a license plate field, separating blocks of text by natural speech pauses, and audio feedback echoing. *Takebayashi et al.* discloses populating fields of a form from blocks of text for input utterances, and echoing blocks of text back to a speaker. *Cornelison* suggests an application of speech recognition to
